

## **Care for your Electroplated product:**

Electroplated Finishes - Chrome, Satin Chrome, Brushed Nickel

The product you have purchased is solid brass with an electroplated finish.

This metal finish is generally hard wearing and does not require a lot of maintenance. However, care is needed to avoid scratches as these could compromise the appearance of the metal and accelerate any tarnishing.

To prolong the external appearance of the piece, we recommend the following process every couple of weeks (more frequently in coastal areas):-

1. wipe the surface with a damp cloth to remove any surface dirt and salt.
2. when dry, buff to a shine with a specialist chrome or metal polish.
